1 - Using the funds for a community project determined by the bagholderz is dependent upon the collection mint selling out. If the collection is entirely minted to 1000 mints, the direction of the project will remain purely an NFT collection with no utility.

**project description:** NFT collection of all your favorite shitcoins limited to 1000 unique mints on the Ethereum blockchain reflecting on the current market sentiment & crypto community. Mint one to shit on the delusional exit liquidity you just dumped on.

**purpose:** bagholderz is purely an NFT art collection. The funds collected from minting will be stored in a wallet & the bagholderz will decide what to do with the funds as a collective.<sup>\*1</sup>

**contract:** 0xB1612A1bCD9A3558cab86EAB59BF98F79E779d5A

**mint:** 0.1
